

## BREAKTHROUGH DISCOVERY

# Medical Team Discovers How To Reset Hormones For Weight Loss

Now as part of a National Health Drive a limited number of Australians can claim a FREE weight loss and medical assessment.

In what could be a landmark discovery the research team at GTC Medical and the Medical Weightloss Institute have discovered a link between hormones and weight gain - affecting most Australians.

For years we have been told by the fitness industry to train hard, join the gym and run, but the only people who benefit from that are gym owners and personal trainers.

It turns out running might actually be making you fat because of the stress hormone cortisol produced from doing strenuous exercises like running. I'm sure this is music to most Aussies ears - but this doesn't mean it's not true. In fact the science stacks up big time and cannot be denied or ignored any longer.

According to medical director Dr Tom Goyer; the hormones insulin and cortisol control weight, not exercise.

"We have developed a treatment plan that can lower the production of the hormone insulin and cortisol making it much easier to lose weight. The results we are seeing are incredible - amazing" says Dr Goyer.

body's fast; "I didn't think it possible to lose weight this fast and easy. Im 66 years old and in the best shape of my life thanks to the medical treatments at MWI. Thanks Dr Tom and Geoff"

"I had been overweight my entire life and tried everything. Nothing worked. Then I had a consult with Dr Tom and it changed everything. I've lost 42kg now and I honestly feel amazing. I had more energy from day 1 on the program. I tell everyone who will listen; they have to try the Medical Weightloss Institute" says Nazih Hamze from Sydney (32 years old)

"Eating a healthy diet is important for health but working with Dr Tom and the medical team I have learnt that hormones control weight loss not food."

This is now a public health issue says sports scientist and MWI co-

goods that's not true.

Exercise won't make you thin - resetting the body's hormones is the answer. There are more gyms and trainers than ever and society is fatter than ever. What we are doing is not working and it is time for change. We have worked out how to reset hormones to burn fat fast without strenuous exercise. Exercises like running make you store fat not burn fat on areas like your stomach."

The medical team at MWI have created treatments that can reset hormones and help to speed up metabolism.

As part of a National Health Drive 200 Australians can claim a FREE medical assessment.

"Medical weight loss treatments make the early stages of weight loss easy. When people diet they feel tired and lethargic for the first month. Not with MWI. People have more energy and feel amazing from day 1 and because we reset the hormones with the treatments - the weight falls off" says Jowett.

The process..

- Blood test analysis
- Doctor consultation

Lesley Hoff, 66  
Goolwa,  
South Australia

Everyday Australians like 60 year old Lesley Hoff from Goolwa South Australia are totally transforming their

because they are getting fatter and fatter because they are being sold a bill of

### HOW ARE RESULTS LIKE THIS POSSIBLE?

#### BEFORE TREATMENT

Hormone imbalance causes cravings, mood swings and problems with weight.

#### AFTER TREATMENT

Hormone balance restored. Subject feels full and satisfied for longer, starts losing the urge to binge eat and takes control of weight issues without turning lifestyle upside.

### WHO'S BEHIND THIS BREAKTHROUGH?

**Dr Tom Goyer** is a medical doctor who has been helping patients at his North Sydney Clinic lose weight for almost a decade.

Tom is an Associate Member of the Cosmetic Physicians Society of Australia, the Australian Society of Cosmetic Medicine and the Australian College Of Phlebology.

Over the past 20 years, **Geoff Jowett** has helped as many as half a million Australians lose weight.

Geoff is the creator of BodyTrim, Australia's most successful weight-loss program. He is the co-founder of Vision Fitness, Australia's largest personal training company. And he holds a Sports Science Degree.

- Lose weight fast
- No strenuous exercise required
- Reset hormones to burn fat
- Never hungry
- No calorie counting
- Lose weight off 'trouble areas'

"With running and other strenuous exercise you often lose weight off the areas you don't want to lose weight - ie for women that's the breasts" says senior program manager Charlotte Evans.

With this new tailor made medical treatment the weight comes off the trouble areas only; Hips, thighs, stomach. Treatments target the "fat zones" so you trim down in all the right areas and keep curves where they should be.

The tailor made treatments are designed to target wherever you struggle with weight by resetting your body's hormones to burn stored fat for fuel.

Lowered insulin production allows your body to burn fat for fuel. High insulin makes you store fat. MWI treatment lowers insulin production so you burn fat.

Lowers production of the stress hormone cortisol; Helping burn tummy fat. Cortisol causes you to store belly fat.

The team at MWI are so excited about this breakthrough that they want 200 Aussies to have a FREE CONSULTATION and medical assessment to gauge if the treatment is right for them and learn more about their health. Simply call 1300 290 147 and be one of the first 200 to register for your free consult and health screening.

### YOU ARE JUST ONE PHONE CALL AWAY FROM A BETTER LIFE.

- Great results. Clinically supported data. Works even if you have very little time to exercise.
- It's easy to see why this treatment is the smart choice for losing weight.

Now you can experience these lifechanging benefits too.

#### To get started, contact us today for a FREE MEDICAL ASSESSMENT

But you must hurry. Free assessments are strictly limited to the first 200 callers only

From 8am today, the **FREE MEDICAL ASSESSMENT** Hotline is open. Call 1300 290 147. We will fill spaces on a first come, first served basis. There is no obligation if you call.
